

Here's How To Help Change Things Now

by
Michael Horn

If, after you've reviewed all of the information, research and evidence, you think that the proof for the authenticity of the Meier Contacts is compelling, and you want to help to avert the damage and destruction it foretells for our country and our world, there are still a number of things that you can do that will make a difference. In order to bring about awareness and positive change we have to offer the information, without force or coercion, to others who are interested in knowing about it and to those in the media who are obligated to report the news and matters of public concern and interest. Remember that although you may already know about the case and find it to be credible, the majority of people haven't heard about it yet, at least not in a truthful way.

So, in addition to all of the other positively oriented personal, spiritual, social and/or political work you do, consider participating by doing the following:

1. Contact your local and national radio, TV, magazines and newspapers and bring the Meier Contacts to their attention in a clear, courteous and respectful way, without proselytizing or deliberately insulting anyone. Realize that there has been a virtual blackout and debunking campaign going on against Meier and his information for almost **30 years**. Now that the professional skeptics have been thoroughly revealed as biased, amateurish and incompetent there's no reason to hold back from politely informing those who should, at the very least, be investigating and reporting on the case.

You can inform them about www.theyfly.com and my willingness, as the Authorized American Media Representative, to speak to them and answer questions about the Meier Contacts. If you want to make a stronger impression, contact them and send them a DVD to review. If you do that, it's best to follow up to make sure they received and watched it. Remember, just as each call and letter to a politician is regarded as representing a much larger number of people who share the same concerns, the media also responds to numbers of people contacting them

about a particular issue. I will provide a list of the current top mainstream radio talk shows in the country at the bottom of this page.

2. Learn about the Salome Peace Meditation, its origin, meaning and how you can participate in it along with thousands of other people on Earth...and billions of extraterrestrial humans who, we are told, participate regularly on our behalf. Read the information about the meditation on the DVD and here on my site and also look for further information at: www.figu.org/us You may also want to consider that the Peace Symbol we are most familiar with is, according to the Plejaren, actually *inverted* and expresses a more sword-like, militant intention than the upward opening, more tree-like version. This is said to be significant in terms of how such symbols register on the unconscious. You don't have to believe any of this, investigate and think about it for yourself.

3. Communicate with other people worldwide who are interested in discussing the information in the Meier Contacts at the FIGU Forum at: <http://www.figu.org/cgi-local/forum/us/discus.cgi> This is an excellent place to discuss and learn about all aspects of the Meier Contacts and the Plejaren information. You'll discover people all over the world who share the same interests and concerns as you do, some who may live much closer to you than you think, and all of us are connected virtually instantaneously through the forum anyway. You may even want to join or create a study group regarding the Meier Contacts; some of the forum members already participate in such study groups.

While you may never have thought about it this way, your active, purposeful participation in contacting the media, in the Salome Peace Meditation and on the discussion forum could contribute every bit as much (or maybe even more) to significant, positive change in the country, and the world, than is even made through voting, where the choices and possibilities have already been defined and determined to a large degree. And, while you certainly should exercise your right to vote as you choose, expanding your sphere of knowledge and influence by acting as a self-responsible, truth-seeking person sets a positive and inspiring, living example for others.

The three steps above are by no means the only ones to take; consider them springboards to action. Be creative, contemplate, dream and imagine how you can contribute in your own way and with others. It's much better to be

an active participant in creating positive change than to believe and behave as a passive victim of so-called outside forces.

Remember, prophecies are warnings, they are changeable...if we have the mind to reason and the will to act.
