

Dear Mr. President,

As the leader of the most powerful nation on earth, and with your immense responsibilities regarding the safety of its citizens, I wish to bring to your attention critically important information from an admittedly unlikely source.

I respectfully request that you examine the information from Mr. Billy Meier of Switzerland, the legitimacy of whose UFO contacts (ongoing for the past 62 years) is well known at the higher levels of all intelligence services, ours included. After 25 years of my own research, I have also been able to prove that the case is authentic and meets both scientific and legal standards of proof. It is also clear that the objects he has photographed, beginning 40 years ago, are not related to any such craft that the USA may have been developing at Area 51.

The prophetic information provided to (and published by) Mr. Meier for the past 30 years has proved to be impeccably accurate. As an example, he preemptively published, in both 1995 and 2001, advance warning of our recent attack on Iraq, along with numerous other specific events, which were likewise recently fulfilled. In light of Meier having established an unprecedented foundation of credibility, of immediate concern is the fact that he has been clearly warned that we now face a catastrophic third world war, which could begin in as little as two years (2006), should the direction of our country, the most powerful on earth, not be changed (in ways specified).

Along with foretelling the specific military movements and involvements of numerous countries pertaining to such a conflagration, Mr. Meier was bluntly informed that, in addition to the loss of two-thirds of the world's population and an uninhabitable northern hemisphere, the greatest damage would befall our own beloved country, the USA.

As one who is quite familiar with the case, and who, like you and all Americans, doesn't want to see our country experience the clearly foretold but still avoidable devastation and destruction, I respectfully offer to make available any and all information that I have access to that may not already be in the possession of our government to assist in evaluating the warnings from the extraterrestrial race in contact with Mr. Meier.

While admittedly unflattering to you, the administration and our national military policies (as well as those of other countries), wisdom would dictate that the information receive the attention and honest evaluation of our government and you as its leader.

Sincerely,

Michael Horn
